closures

Array Method

forEach()

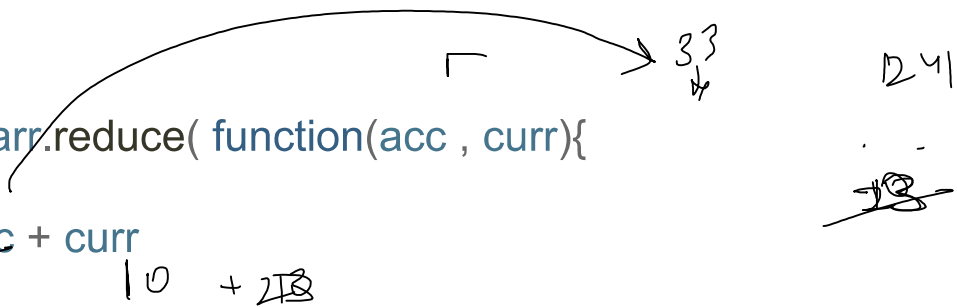

```
let arr = [10,23,1241,25,125,25];
```

```
let initialVal = 0;
```

```
let returnedVal = arr.reduce( function(acc , curr){
```

```
  return acc = acc + curr
```

```
}, initialVal)
```

# Constructor fnnew Keyword

So whenever you call a fn with a new keyword in front of it, then that fn is not just a fn it becomes a constructor fn.

⇒ Role of constructor fn is to create objects.
