

Day-3 (React)

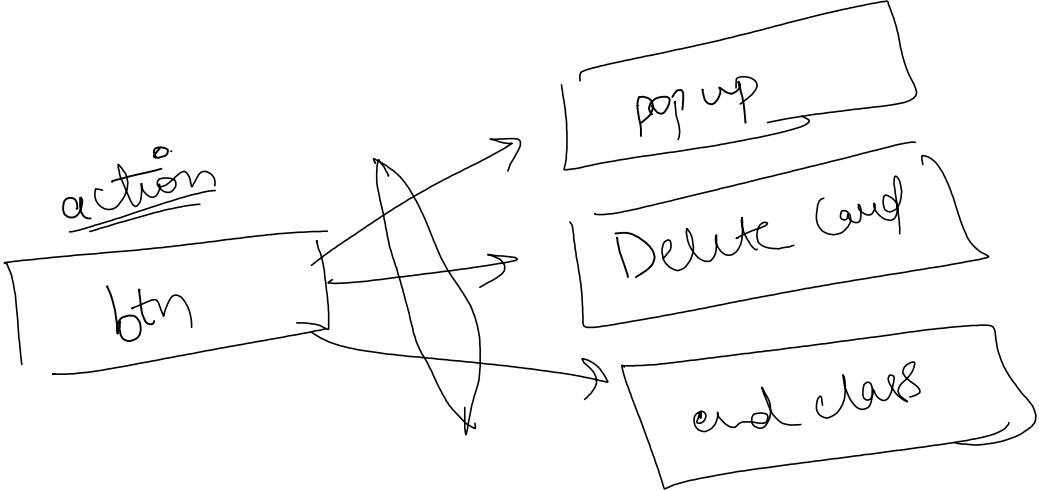

Sunday, 13 April 2025 5:04 PM

```
magicNum = 7 ✓  
let rn = Math.floor(Math.random() * 10) + 1 ✓  
if (rn === magicNum) {  
  console.log("Lucky 7")  
} else {  
  console.log("Better luck NT")  
}
```

Handle Events

! What are Events?

Q what are Hooks?

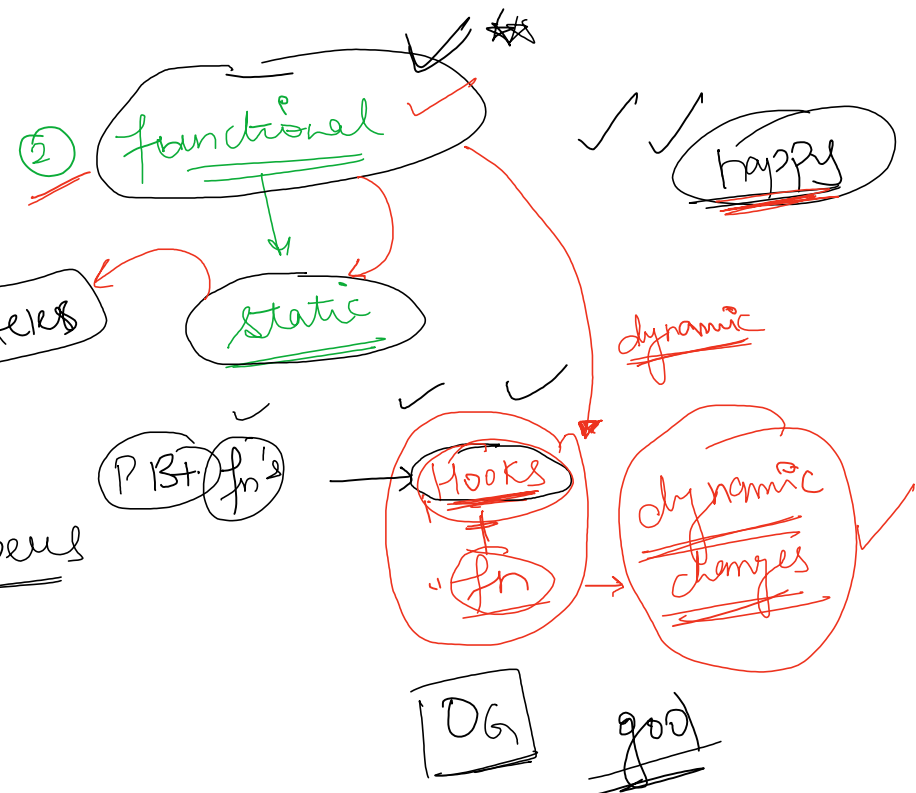

Prebuilt & "Babalog"

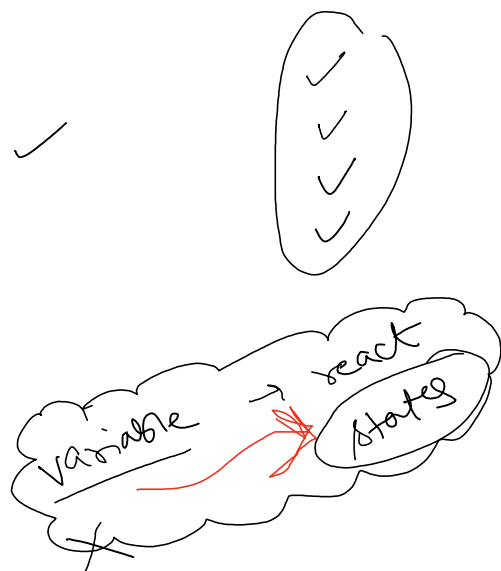

Real Q why Hooks

Components

late developers

How do you know it's a Hook?

useState() } "..." -> fn prebuilt ->

- useEffect()
- useMemo()
- useCallback()
- - etc - - -

Hooks

~~useEffect()~~
