

Database Test Log

1.Displaying all products URL: `http://localhost:8050/api/products`

Code Test Image :

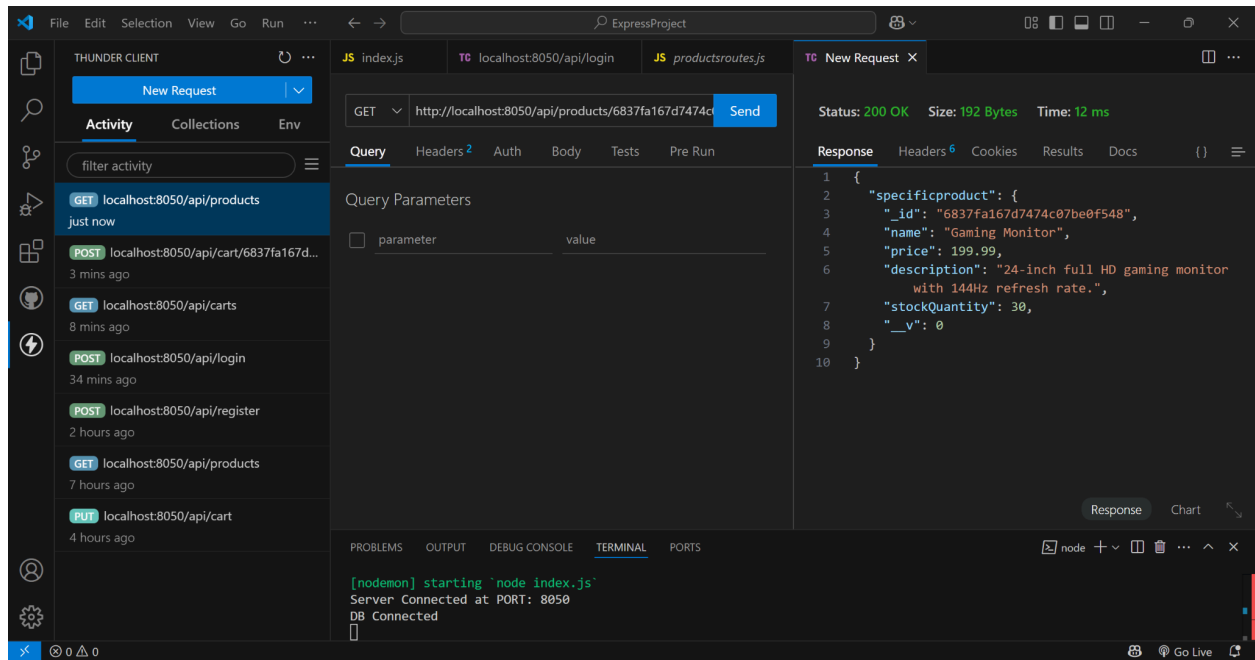

Database Test Image:

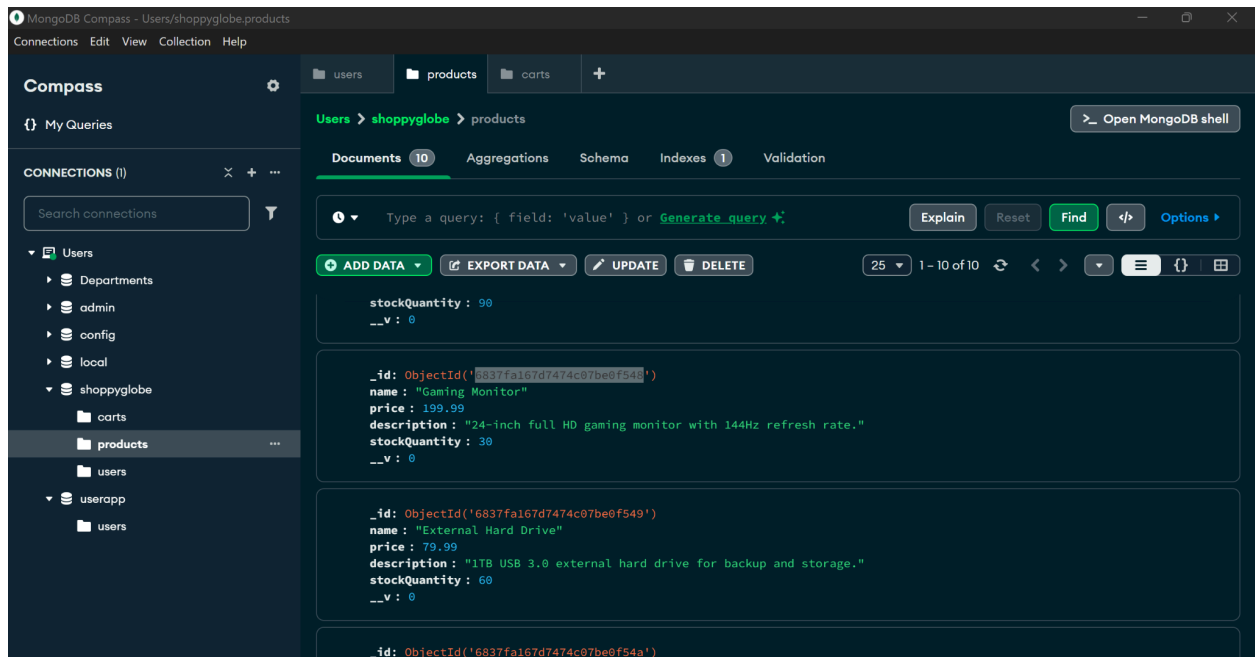

2. Displaying Specific product by ID URL:

<http://localhost:8050/api/products/6837fa167d7474c07be0f548>

Code Test Image:

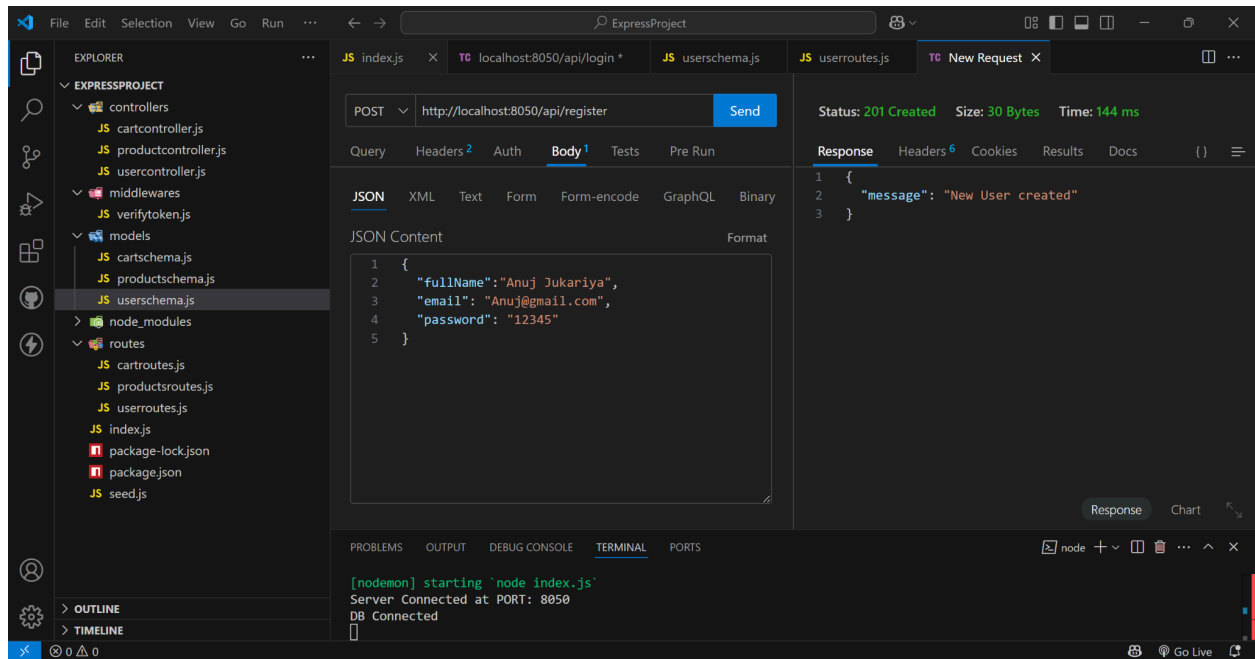

Database Test Image:

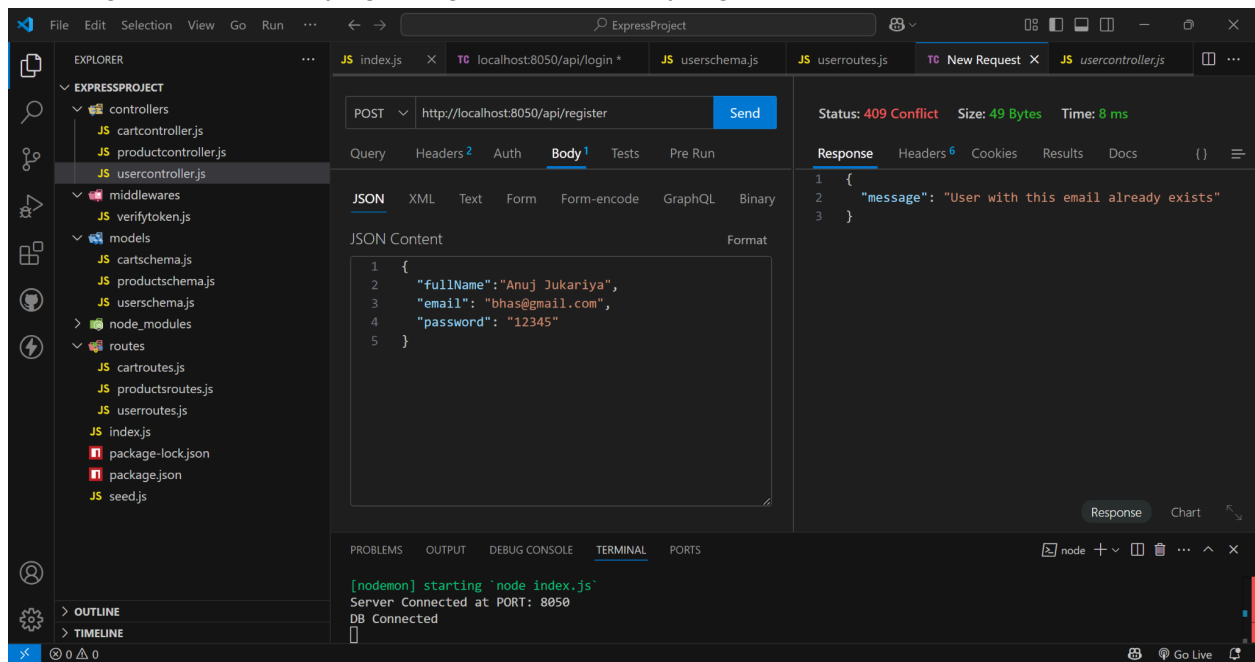

3. Adding New User URL: `http://localhost:8050/api/register`

Code Test Image:

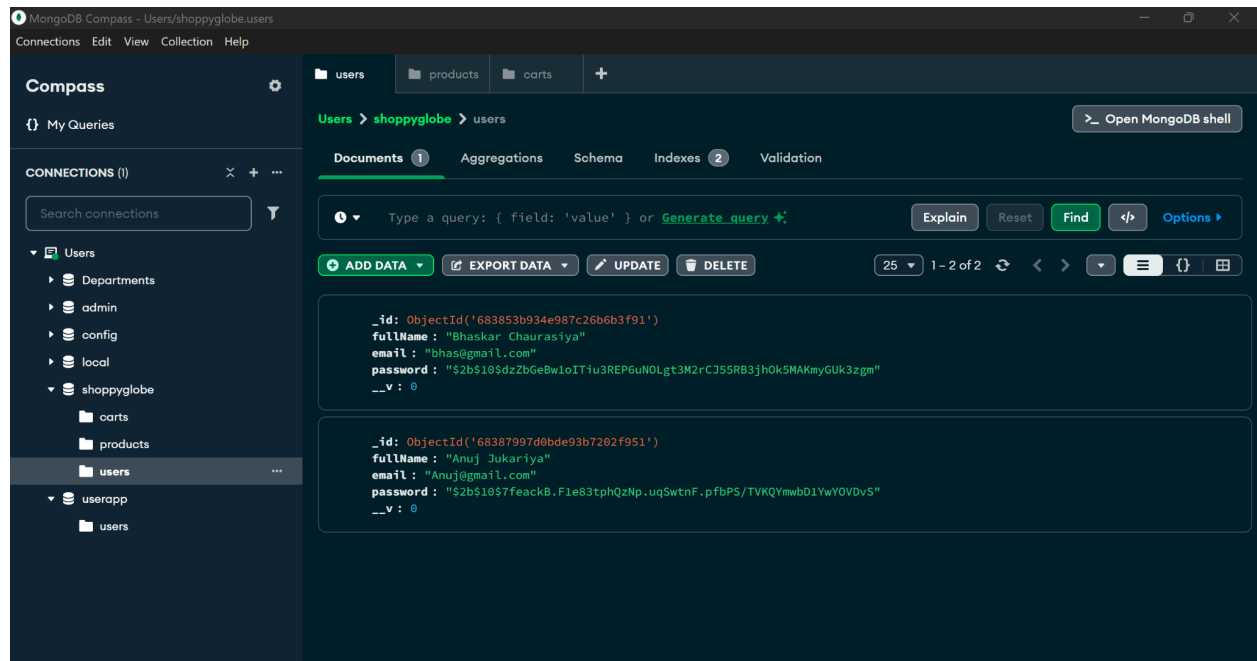

Handling Error, User is trying to register with already registered email id:

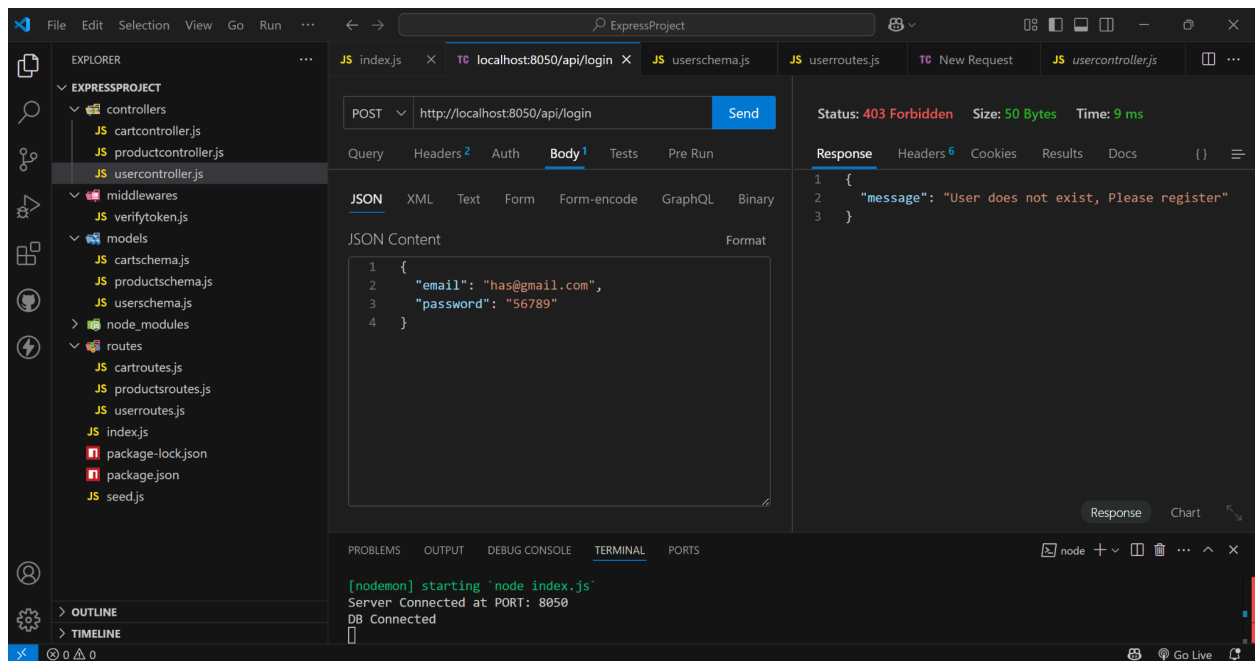

Bhaskar Chaurasiya FSD

Database Test Image:

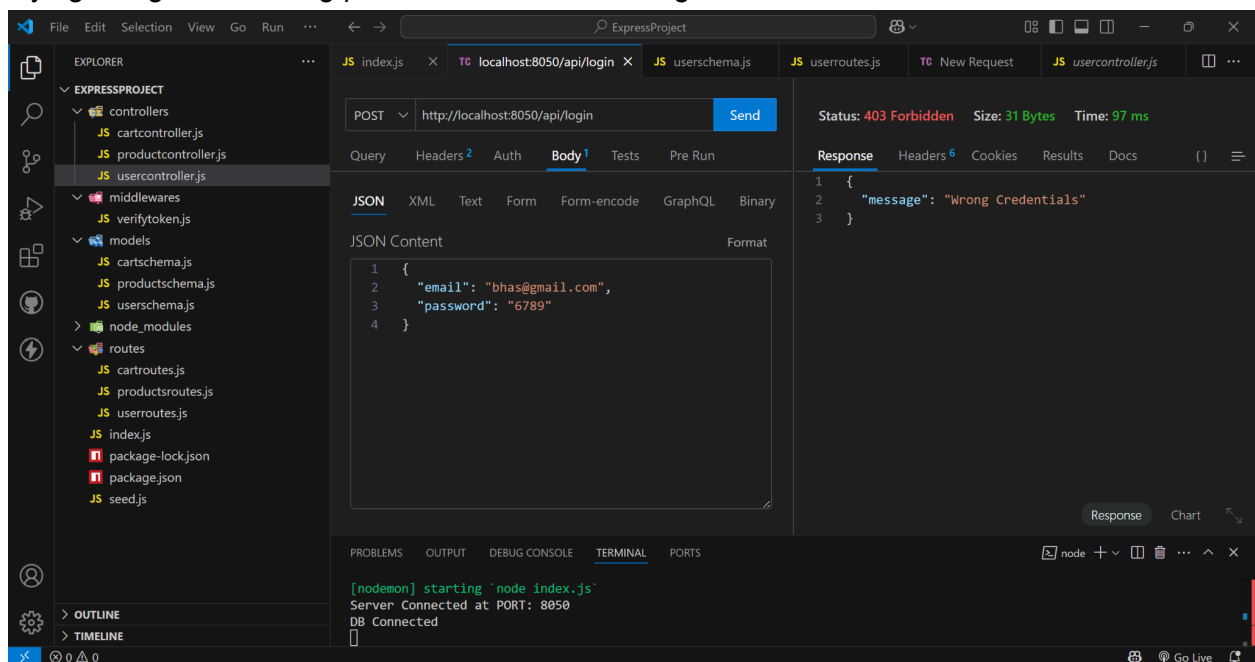

4. Logging In URL: `http://localhost:8050/api/login`

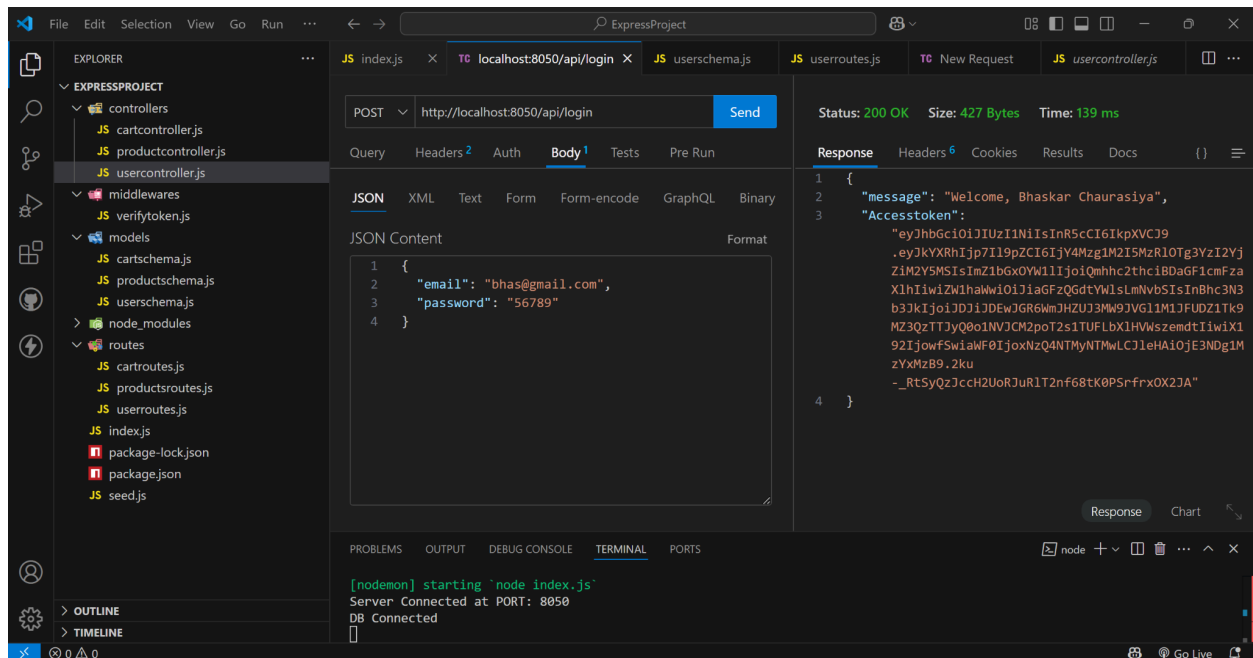

Trying to Login with different credential than stored, Code Test Image:

Trying to login with wrong password, Code Test Image:

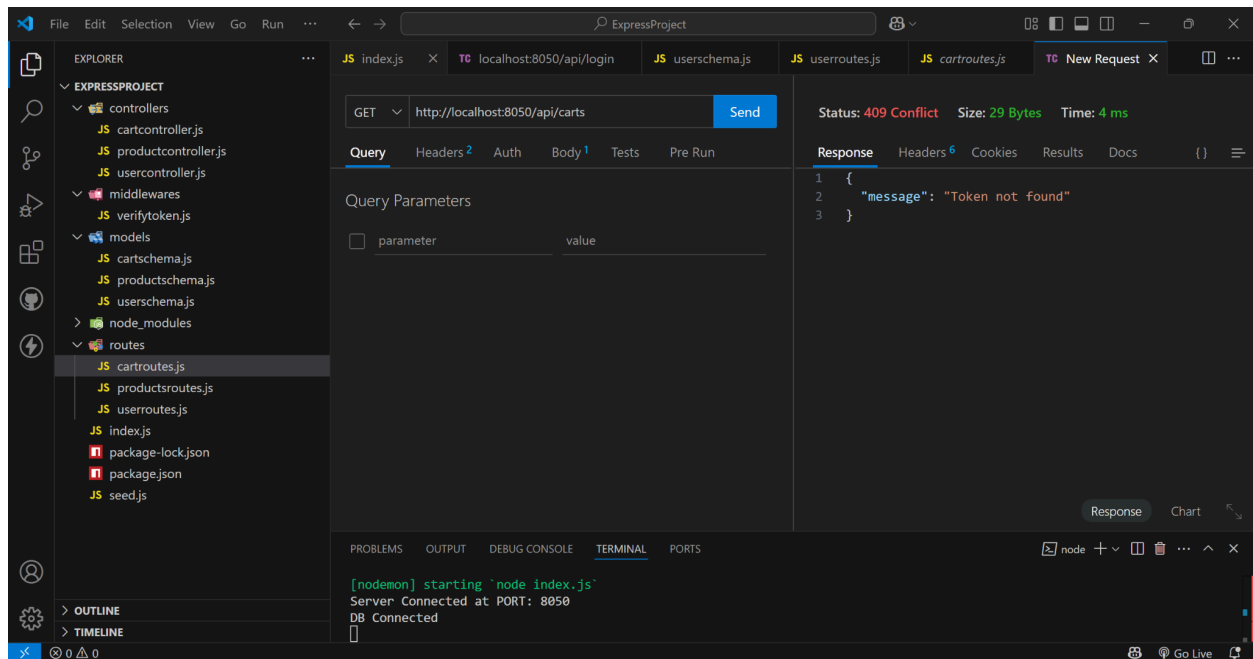

Logging in with Correct credential stored in database, Code Test Image:

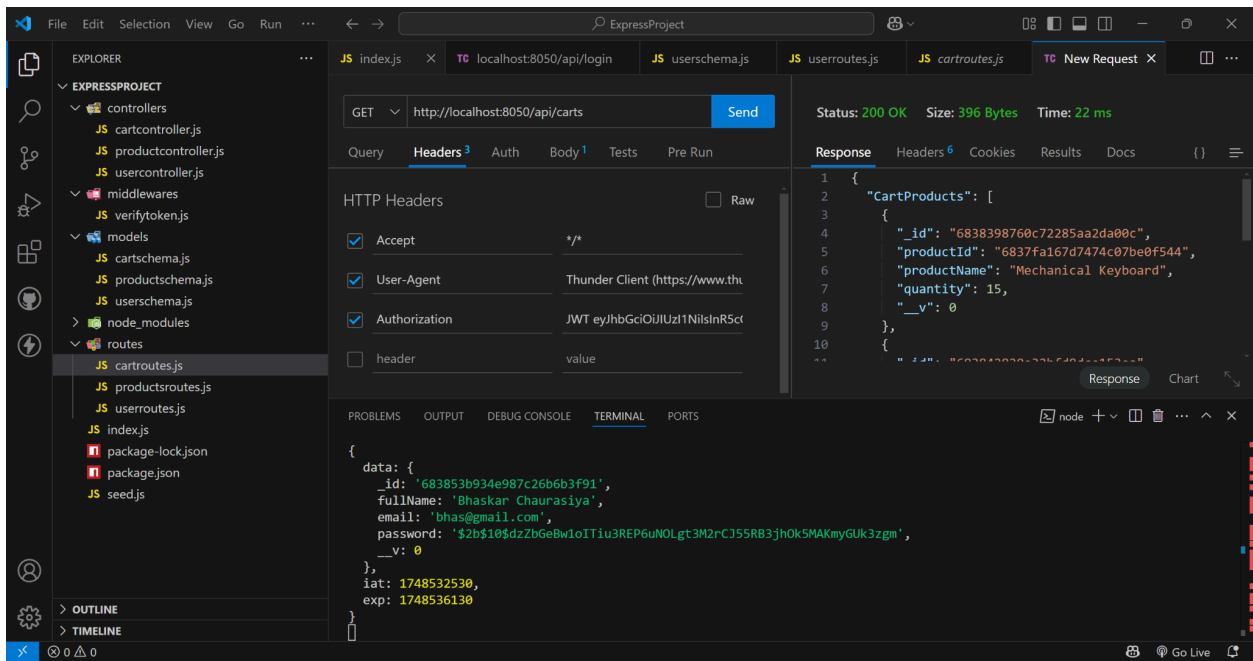

5. Displaying all Cart items URL: <http://localhost:8050/api/carts>

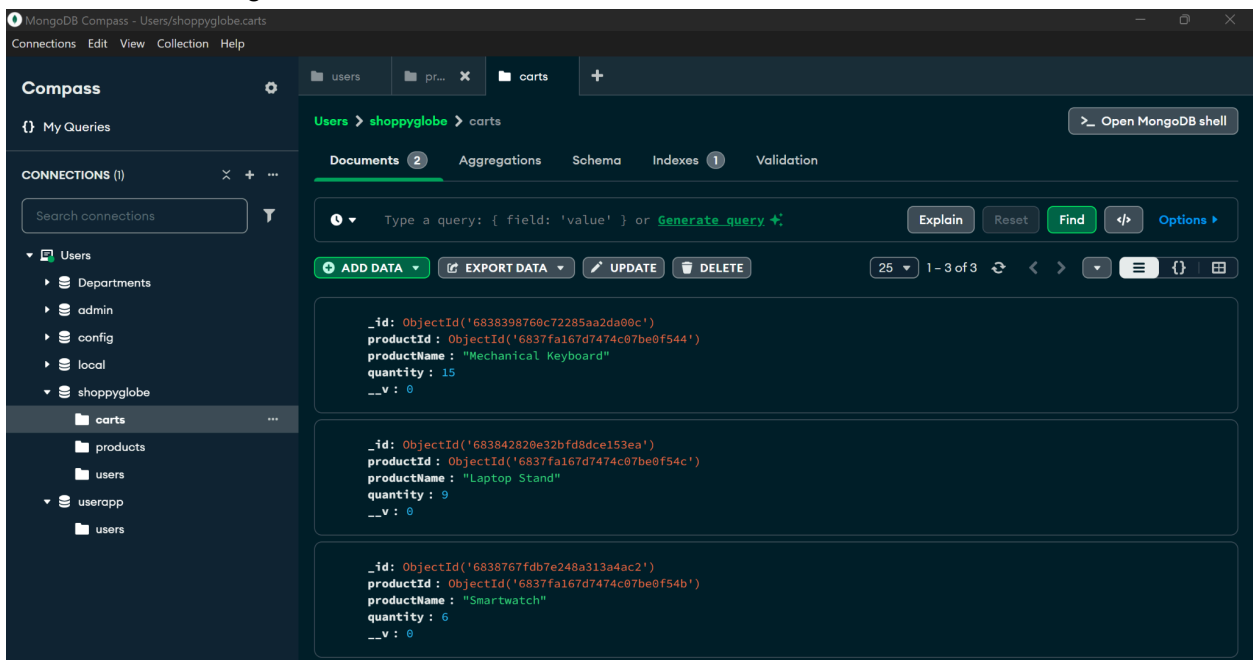

Trying to access all cart items without login:

Trying to Access all cart items after login and putting the token to headers :

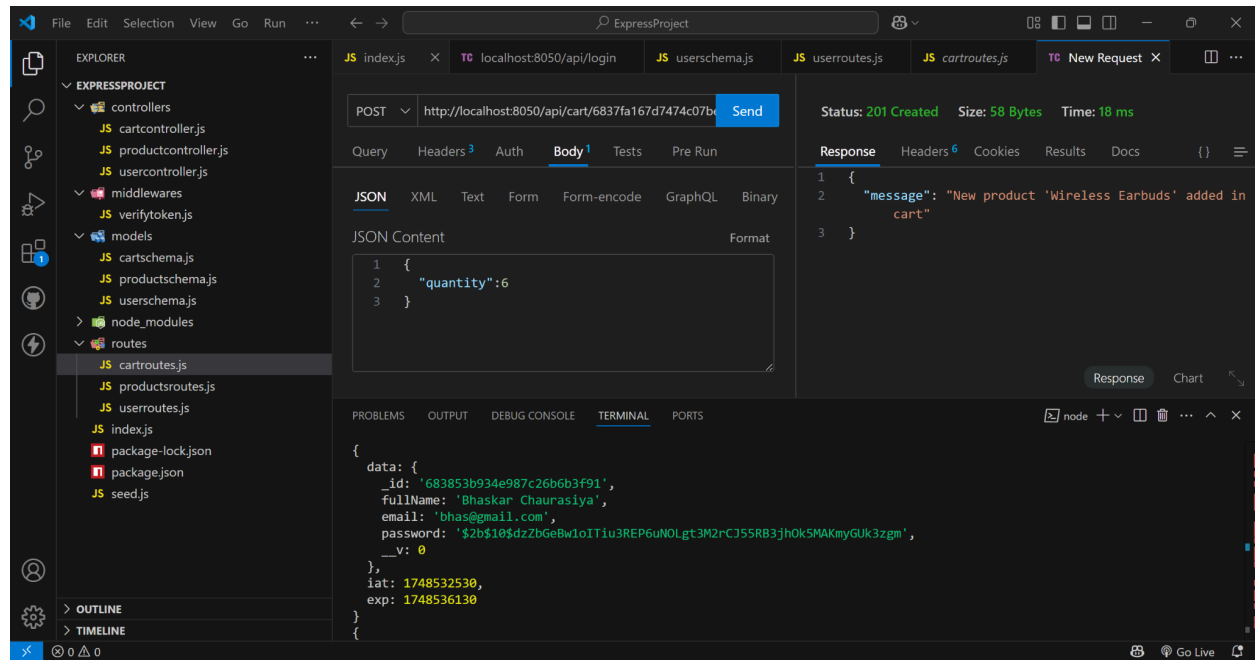

Database Test Image:

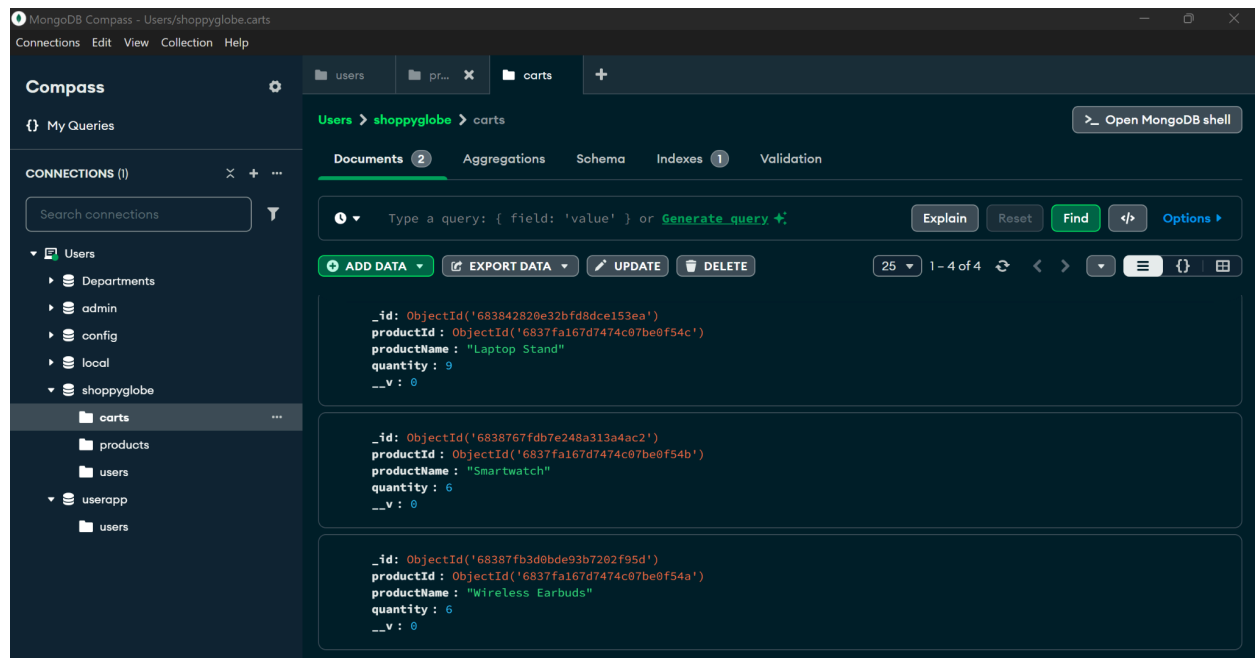

6. Adding item to cart URL: <http://localhost:8050/api/cart/6837fa167d7474c07be0f54a>

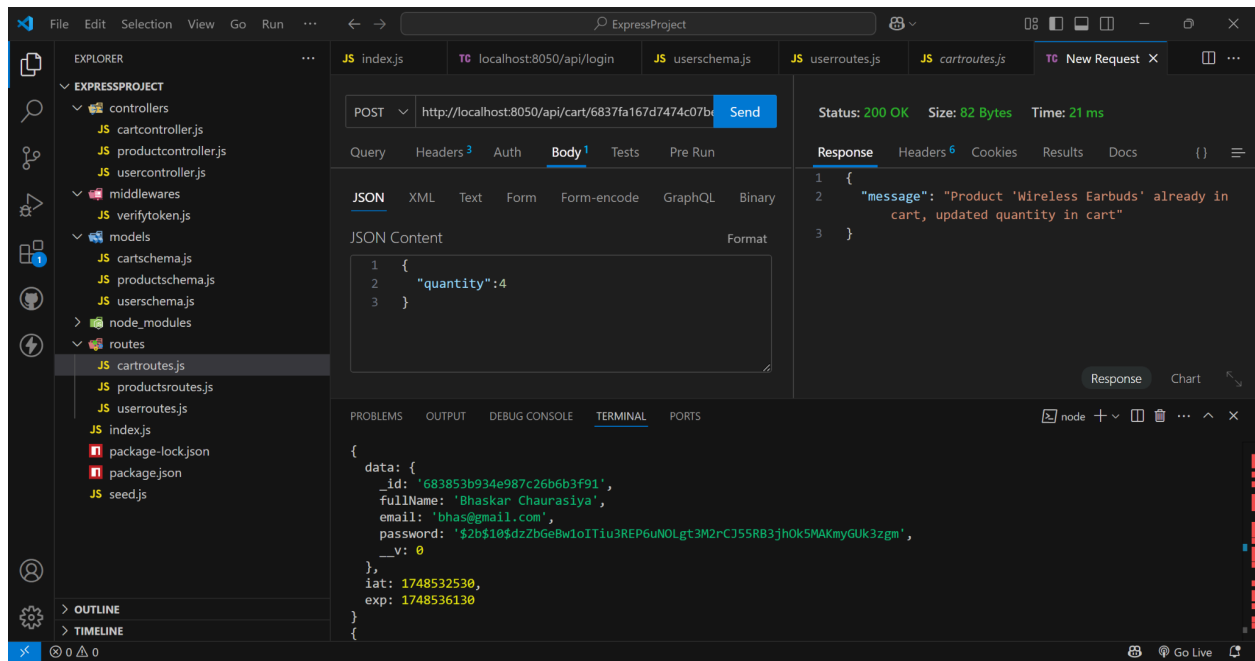

Adding Wireless Earbuds from users to cart:

Database Test Image:

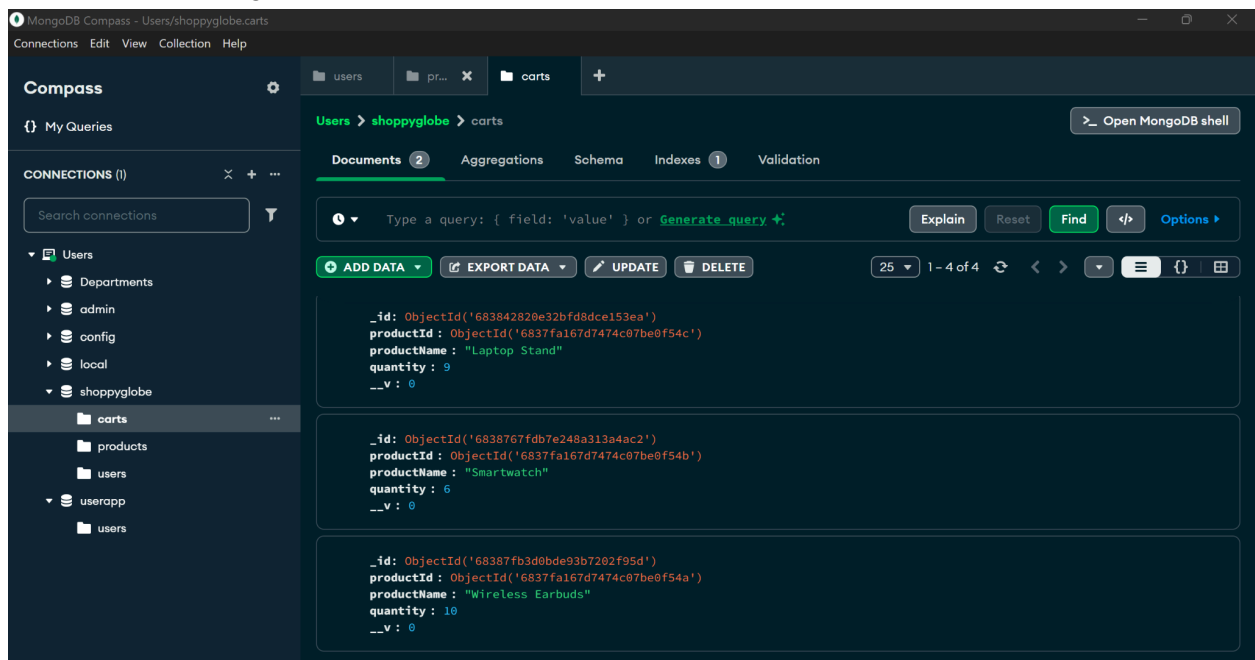

Trying to Add item which is already in cart:

The screenshot shows the VS Code interface with the REST client extension. A POST request is being sent to `http://localhost:8050/api/cart/6837fa167d7474c07be0f54c`. The request body is a JSON object: `{ "quantity": 4 }`. The response status is 200 OK, and the response body is a JSON object: `{ "message": "Product 'Wireless Earbuds' already in cart, updated quantity in cart" }`. The terminal shows the output of the request.

Database Test Image:

The screenshot shows the MongoDB Compass interface. The 'carts' collection is selected, and the 'Documents' tab is active. The collection contains three documents:

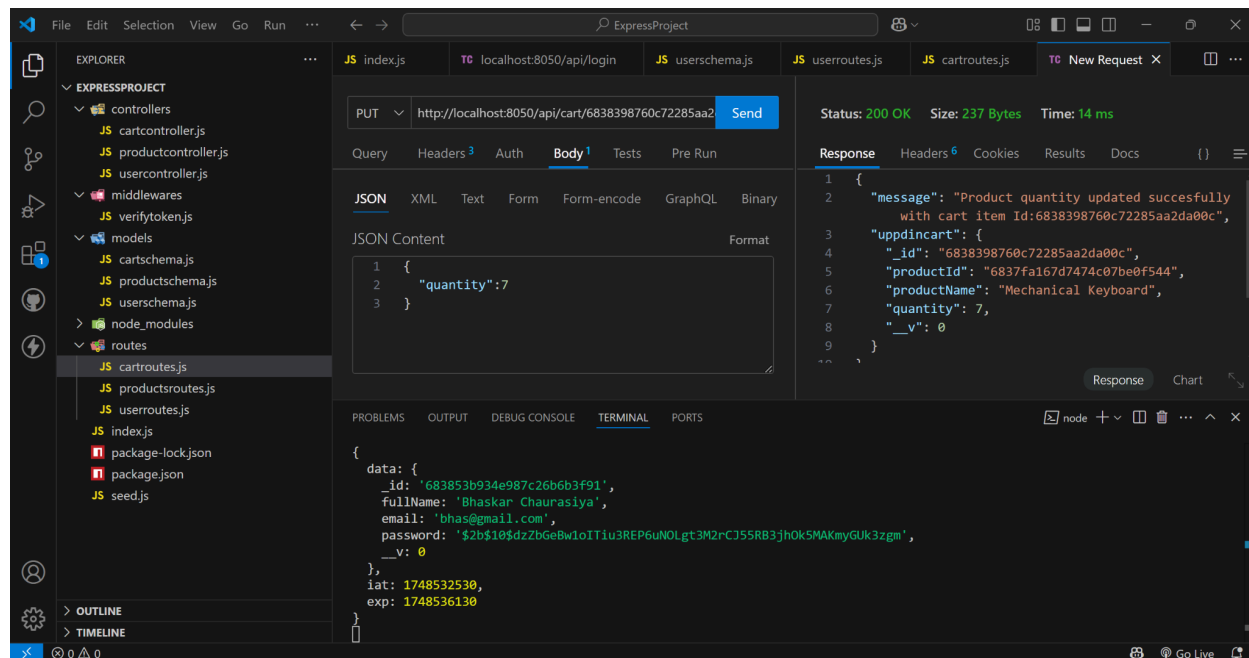

```
{
  "_id": ObjectId('683842820e32bfd8dce153ea'),
  "productId": ObjectId('6837fa167d7474c07be0f54c'),
  "productName": "Laptop Stand",
  "quantity": 9,
  "__v": 0
}
```

```
{
  "_id": ObjectId('6838767fdb7e248a313a4ac2'),
  "productId": ObjectId('6837fa167d7474c07be0f54b'),
  "productName": "Smartwatch",
  "quantity": 6,
  "__v": 0
}
```

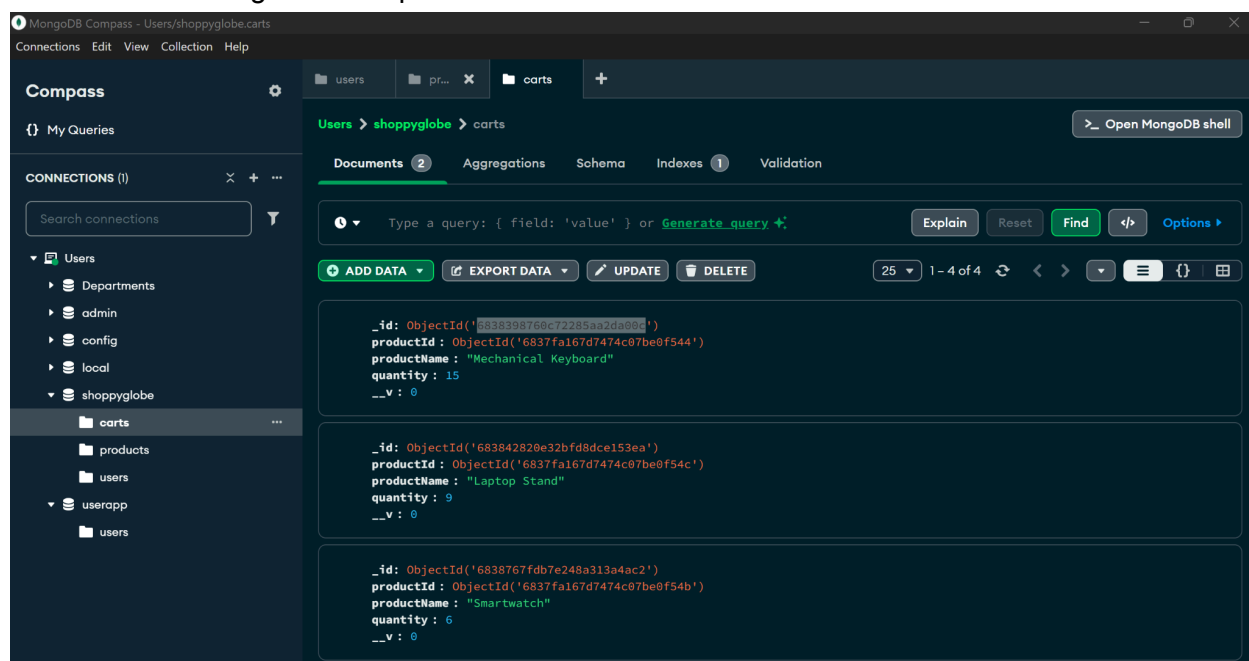

```
{
  "_id": ObjectId('68387fb3d0bde93b7202f95d'),
  "productId": ObjectId('6837fa167d7474c07be0f54a'),
  "productName": "Wireless Earbuds",
  "quantity": 10,
  "__v": 0
}
```

7. Updating item in cart URL: <http://localhost:8050/api/cart/6838398760c72285aa2da00c>

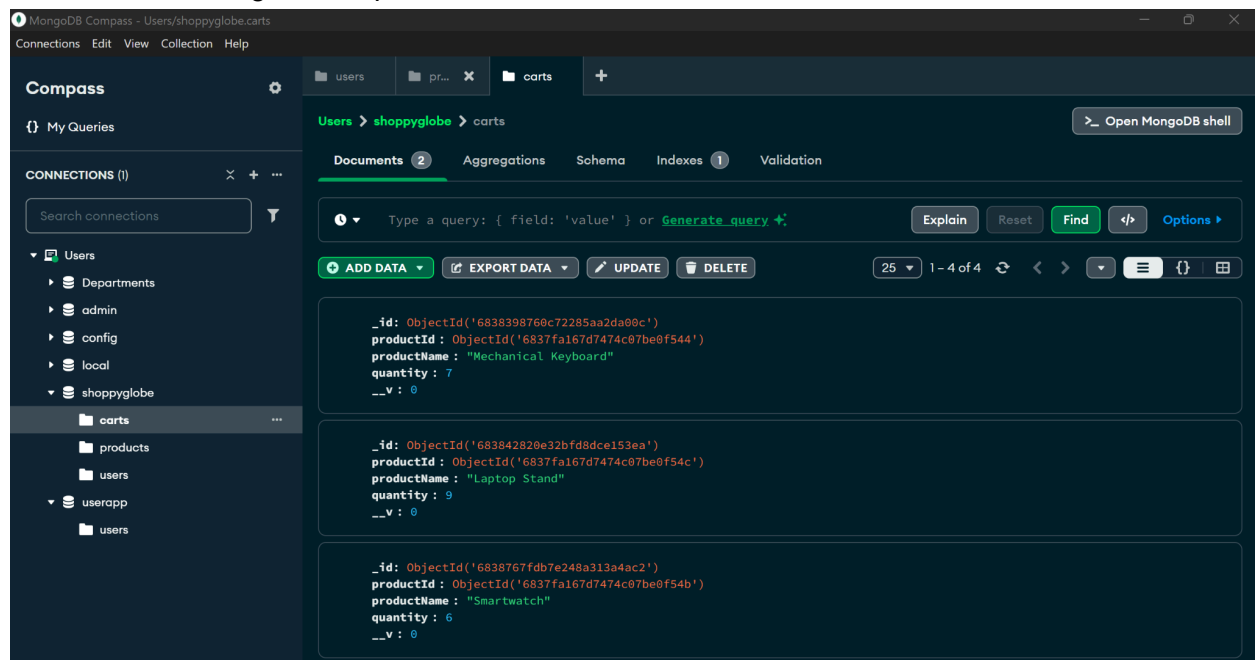

Updating 'Mechanical Keyboard' quantity from 15 to 7:

Database Test Image before updation:

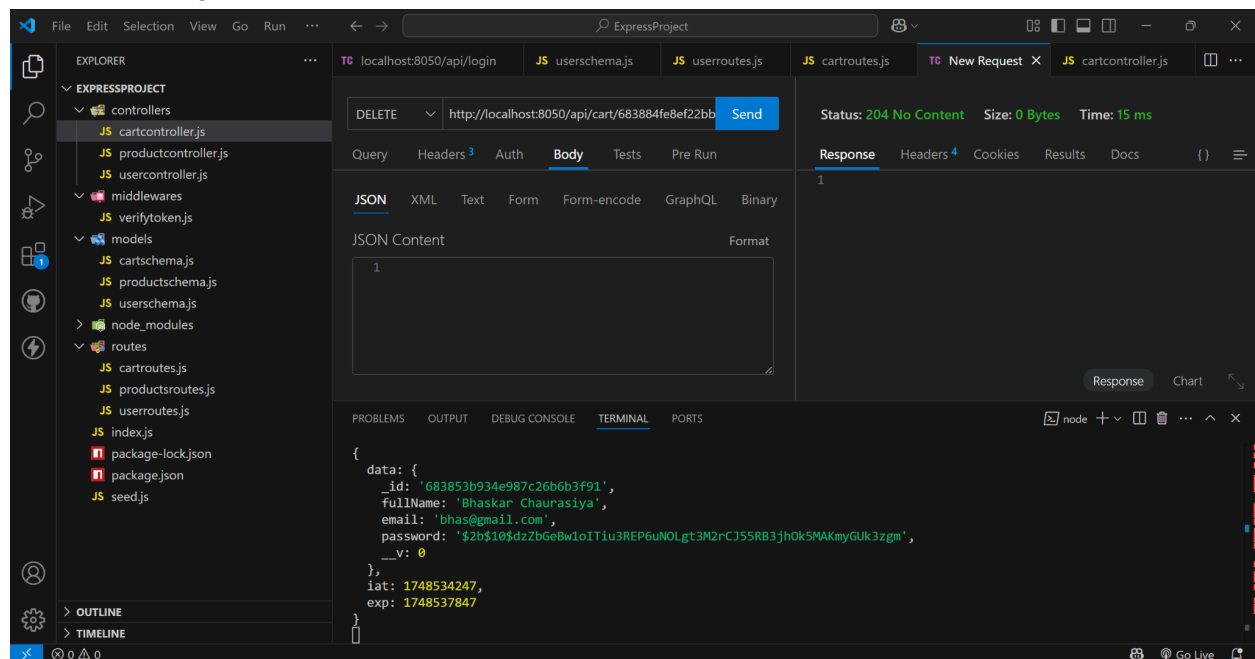

Database Test Image after updation:

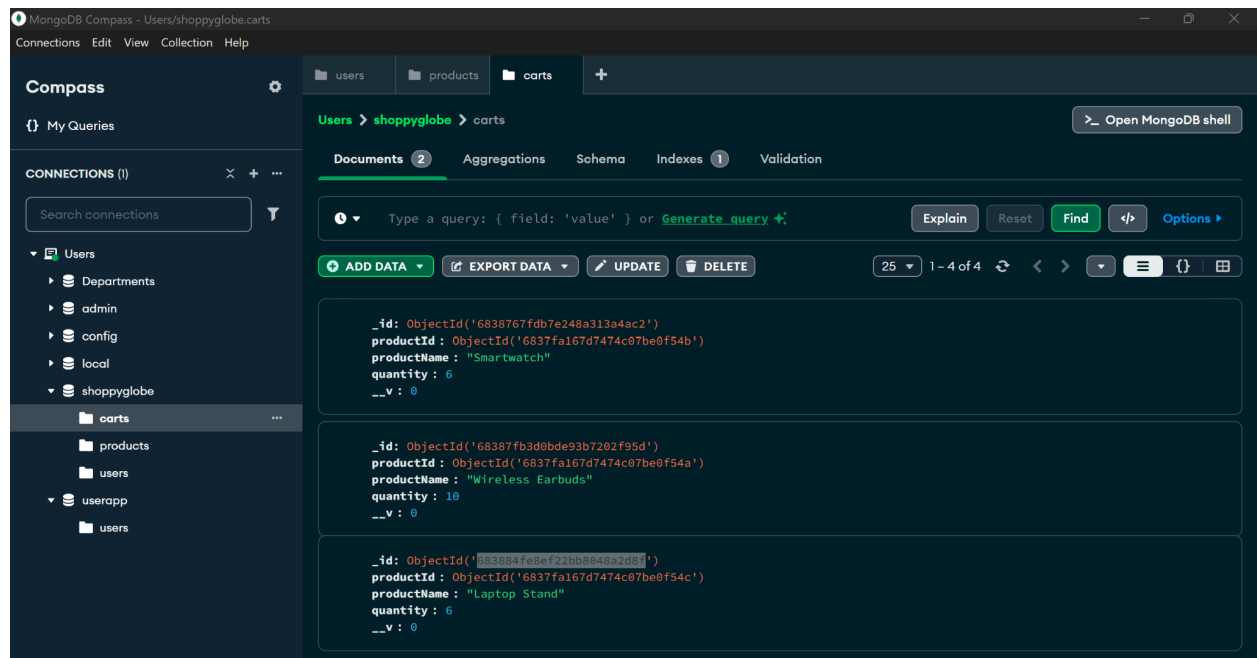

8. Deleting item from cart URL: <http://localhost:8050/api/cart/683884fe8ef22bb8048a2d8f>
